INNOVATIVE TECHNICAL FURNITURE

Console systems designed around you and your equipment

The ability to turn customer's work environments into creative, elegant, and functional workspace solutions has made Forecast Consoles the industry leader in technical furniture and consoles for over three decades. The proven success of Forecast Consoles lies in its ability to anticipate the advances in multimedia technology and quickly develop creative solutions to accommodate these new toolsets. From Broadcast Television and Radio, Editing, Post Production, to Graphics, Security & Surveillance, Forecast Consoles has an elegant functional workspace solution for you.

GCX product line options:

W

Workstation
Individual Console

GCX-W

- Stationary console available in 1, 2 and 3 bay wide X-Chassis
- Legs have removable panels to access cables from X-Chassis to floor
- Lift-off, removable, vented turrets and filler panels available

S

Sit-2-Stand
Electronic Height Adjustable

GCX-S

- Countertop height fully adjustable from 25" to 50"
- Motorized legs have a 500 lb. lift capacity
- Flexible and protective cable management
- Console available in 1, 2 and 3 bay wide X-Chassis
- Electronic handset switch has 3-programmable height settings

C

Continuum
Expandable and Configurable

GCX-C

- Infinitely expandable and configurable console
- Based on combining 1, 2 and 3 bay wide X-Chassis to create a fully customized console
- Can be configured in any shape to compliment any size room

The anatomy of a GCX:

- 1 Lightweight steel **X-Chassis** with removable hinged doors. Available in 1, 2 and 3 bay widths.
- 2 Vented and lift-off **removable turrets** are available in 2, 3, 4 & 5 rack units (Can be combined with 1 and 1/2 bay countertop fillers).
- 3 Available in multiple **countertop** sizes, styles and finishes.

- 4 Stationary legs for **Continuum** (GCX-C) & **Workstation** (GCX-W). Legs have removable panels to easily route cables to the floor.
- 5 **Sit-2-Stand** console (GCX-S) uses electronically controlled height adjustable legs. Adjusts from approximately 25" to 50" at countertop height.
- 6 **Rear Rail** for accessory mounting.

The look of your GCX:

Give your consoles their own look

COUNTLESS COUNTERTOP VARIATIONS

Various countertop shapes, end details, materials and colors allow you to create the perfect console for your needs.

CURVED COUNTERTOP

SQUARED COUNTERTOP

CAPPED COUNTERTOP

Standard Laminates

A leg to stand on

LEG OPTIONS

Console leg comes standard with adjustable height floor levelers. Combination lockable front & free-wheel rear casters are available as an upgrade.

GCX in action:

One man show

GCX-W WORKSTATION -
EVERYTHING AT YOUR FINGERTIPS

Workstations offer the best possible solutions for non-linear editing, graphics and color correction workstations. The consoles are pre-engineered, affordable and ready for quick-ship.

Rise to the occasion

GCX-S SIT-2-STAND -
ELECTRONIC HEIGHT ADJUSTABLE

All GCX-S are fully height adjustable with electronically controlled actuators, capable of 500 pounds of lift. This allows the countertop height to go from 25 inches above the floor all the way to 50 inches.

NOTE: Countertop height is not shown in the lowest position

Infinitely expandable and configurable

GCX-C CONTINUUM -
FITS ANY/EVERY ROOM SIZE OR SHAPE

Continuum can be configured in rows, or in concave or convex curves as well as freeform S-shape footprints. The lower transition panels ensure that wiring between units is protected and hidden from view. The rear aluminum extrusion (accessories rail) is custom cut to match the final shape allowing for easy addition and relocation of the monitor arms and other mounted accessories.

X-CHASSIS

- Precision laser cut, lightweight steel X-Chassis with front and rear hinged/removable doors
- Perforated for ample ventilation
- Integrated power distribution options
- Multiple slots for managing cables
- Strategically placed holes for cable routing
- Open design for easy access

GCX-Chassis™

Specs & Configurations

CABLE PATHS ensure that wiring can easily be passed between X-Chassis' and support legs while remaining unseen.

(GCX-W and GCX-C models)

FLEXIBLE CABLE CHAIN ensures that cables are not damaged, pinched or pulled during height adjustment.

The MasterVision Advantage:

OPEN Architecture

The open frame design and continuous integrated cableway makes pulling cables and wiring easier and more accessible.

MasterVision rack turrets and monitor drop wells can easily be removed and replaced to meet changing equipment needs. Just lift and replace, no tools needed.

TOOL- LESS Adjustments

LOW Profile

MasterVision's sleek, low profile design gives users better sightlines and a shorter reach to touch screens and rack equipment.

MasterVision consoles can be configured to fit almost any space. Angular transitions are also available to create custom footprints.

CUT TO FIT Anywhere

The anatomy of a MasterVision:

- 1 Custom designed aluminum extrusion forms a continuous central core.
- 2 Steel countertop arms interlock into the front extrusion and can be positioned and repositioned as needed.
- 3 Steel stanchions form the structure of the continuous central core.
- 4 Steel leg assemblies include adjustable levelers and cable pass-through to allow easy routing to the floor.
- 5 Removable front and rear panels to allow for easy access.

- 6 Continuous wire cableway.
- 7 Optional 14 outlet power distribution can be mounted along entire central core.
- 8 Vented lift-off removable turrets available in 2, 3, 4 & 5 rack units.
- 9 Drop wells and countertop extensions are available in 1/2 & 1 rack bay wide or custom width
- 10 Rear extrusion for mounting accessories.

The technology inside MasterVision:

Total Access & Flexibility

OPEN ARCHITECTURE BASE STRUCTURE

The open frame design and continuous integrated cable tray makes pulling cables and wiring easier than ever. Laser-cut machine formed steel stanchions and footings are unified with anodized aluminum extrusions, maximizing strength and reducing overall weight. Extrusions can be cut to any length and are not restricted to bay widths.

Run wiring through legs

CABLE PASS-THROUGH IN LEG

Cables can easily pass from your equipment through the leg to the floor.

Continuous Cableways

Cable management throughout the console.

Ready for all your gear

EASILY ARRANGE AND RE-ARRANGE TURRETS AND FILLERS AS NEEDED

Rack Turrets are available in 2, 3, 4 and 5 rack units. Countertop extensions and drop-wells are also available. Both have cable pass-through slots to allow desktop equipment cables to pass into the central core.

The look of your MasterVision:

Give your consoles their own look

The MasteRail Advantage:

RACK & STACK

With customizable rack bases and a wide variety of rack turret options, MasteRail can support almost any equipment.

Welded steel sub-structure, aluminum extrusion and composite materials ensure lasting durability.

BUILT TO LAST

Complete ACCESS

No more crawling under consoles. Hinged top and rear access doors on the turrets make maintenance a breeze. Access lower equipment through front and rear lift off panels.

Using a combination of rack bases, clear bay spans and angled transitions ensures the right shape for your space and workflow.

USER Customizable

The anatomy of a MasteRail:

|---|---|

The technology inside MasteRail:

Building Blocks

1-BAY (19" WIDE)

The concept behind the MasteRail™ technology is the use of pre-engineered components to provide a foundational structure for an infinite number of configurations and layouts. Base frame components are designed to be modular, allowing for future expansion and reconfiguration. A variety of finished materials can be applied to the framework to achieve any desired look or style. You get the custom look, without the custom price. All MasteRail™ components are designed with precision tolerances, allowing for fast, error-proof assembly.

Wiring

MasteRail uses an open interior design to route wiring between upper rack turrets and lower base structure. Rack bases have an open bottom allowing cables to pass through the floor.

Continuous Cableways

Cable management runs throughout the console.

Ready for all your gear

EASILY ARRANGE AND RE-ARRANGE TURRETS AND FILLERS AS NEEDED

Turrets come in a variety of sizes and configurations (Flat-Top, Straight Face, Split Face, Extended Face as well as Countertop Extensions and Drop Wells). All designed for proper ventilation and easy access.

Everything exactly where you want it

MasteRail™ UNIVERSAL MOUNTING SYSTEM

Aluminum Extrusion has a channel used to mount a variety of accessories giving you maximum flexibility

REAR EXTRUSION

Maximum Storage Area

Each rack base has 9 RU of usable space with an additional 1 RU reserved for rackmount PDUs. All concealed behind vented lift-off panels.

The look of your MasteRail:

Give your consoles their own look

COUNTERTOP VARIATIONS

Countertop shapes, end details, materials and colors allow you to customize your ideal console.

FC-MR-T-EF-6
(6RU Extended Face Turret)

Straight Face Turrets

The classic MasteRail Turret. The lower 2 rack units sit below the countertop and are used for no or low touch equipment.

Split Face Turrets

Split Face Turrets are designed to have the lower 2 rack units below the countertop for improved sightlines. The compound angle of the Split Face allows the equipment in the lower 2 rack units to be more accessible.

Specs & Configurations

QuickRail Monitor Mounting

QuickRails are designed as a universal mounting platform, compatible with almost any monitor mount. We stock two mount types, standard tilt and fully articulating.

MonoRail Monitor Mounting

MonoRail is designed specifically for video wall mounts. They offer a full range of post installation adjustments ensuring a seamless bezel to bezel installation. The mounts can slide horizontally across the full width of the rail and come with a quick release for easy removal and maintenance.
